Software Engineering Intern

To Whom It May Concern

I would like to apply for Software Engineering Intern when I was browsing Google+. I have learned from you in the seminar in The University of Auckland.

I am currently majoring in Computer Science in The University of Auckland and will receive my degree in Spring 2015. While I have comprehensive computer backgroun, my emphasis is on programming.

I remembered my first in touch with programming languages were Python, HTML and CSS, and then I get addicted into programming. Maybe I am not a talent programmer however I work hard and thirsty for new knowledge. Maybe I am not an outstanding students compare to all candidates, however, I have passion to learn and keep track of what is going on. I am a good team player.

The first computer related position I was held was a field technician in IT-GUYS in Auckland. It was a volunteer position. I have learned Level 1 technical support, and deal with different kind of customers includes On-site or Online support via skype, phone or teamviewer. However, this is not the job I wish to work on. I love to work on programming related position such as software or website. My first choice will be Software and second choice will be Website.

I am able to travel overseas and would like to have the opportunity to talk with you for further discussion and discuss any intern opennings you might have. I would like to learn more in programming but lack of chance.

Thanks for your consideration

Your Sincerely

Catherine
